

NetzDG Transparency Report

January 2019

1. GENERAL OBSERVATIONS

General observations outlining the efforts undertaken by the provider of the social network to eliminate criminally punishable activity on the platform.

We strive to create a safe and trusted platform that curbs the spread of content that is criminally punishable, while also respecting our community's rights, including freedom of expression. In order to achieve this balance, we take a multi-faceted approach to addressing potentially criminal activity on our platform.

First, we maintain a set of Community Standards that define what is and isn't allowed on Facebook, and that in many instances tracks what is unlawful under German law. These standards apply to content worldwide and are integral to protecting both expression and personal safety on Facebook. Our Community Standards prohibit a wide range of objectionable or harmful content, including content that:

- Promotes violent and criminal behavior
- Threatens the safety of others
- Is considered hate speech
- Is considered graphic violence
- Is considered spam
- Is harmful to minors

Our reviewers enforce these standards using [comprehensive guidelines](#), which ensure that decisions are as consistent as possible. The Community Standards are created by a global team with a wide array of backgrounds, including those who have dedicated their careers to issues like child safety, hate speech, and terrorism. This team regularly seeks input from outside experts and organizations to help balance the different perspectives that exist on free expression and safety, and better understand the impacts of our policies on different communities globally.

People who use Facebook can report Community Standards violations in a variety of ways, including through an option appearing with each piece of content. When content is reported, we review the content to determine whether it violates our Community Standards and remove it if it does. In addition, Facebook uses detection technology and people on our trained teams to help identify certain types of potentially violating content, including terrorist content and child exploitation imagery, and flag it for review. For example, our detection technologies are particularly effective at identifying terrorist content, with 99% of the terrorist content we remove having been flagged by our systems before anyone on Facebook reports it to us.

Second, when something on Facebook is reported to us as violating local law, but doesn't go against

our Community Standards, we may block the content from being available in the country where it is alleged to be illegal. People in Germany can report certain categories of potentially violating or unlawful content through a variety of reporting channels. These include, for instance:

- [NetzDG reporting form](#) – This form allows people in Germany to report content they believe violates one or more of the German Criminal Code provisions set forth in NetzDG (more information on this form can be found in Sections 2 and 4 of this report).
- [Intellectual property reporting forms](#) – These forms allow people to report content they believe violates their intellectual property rights, including copyright and trademark.
- [Defamation reporting form](#) – This form allows people to report content they believe defames them. This may include content that is a false assertion of fact, leading to injury to reputation under the law.
- [Privacy rights reporting form](#) – This form allows people to report images or videos they believe violate their privacy rights.

2. REPORTING MECHANISMS/CRITERIA

Description of the mechanisms for submitting complaints about unlawful content and the criteria applied in deciding whether to delete or block unlawful content:

If someone believes content on Facebook is unlawful under one or more of the German Criminal Code provisions covered by NetzDG, they can report it using Facebook’s dedicated [NetzDG reporting form](#). This form has been in place for people in Germany since January 1, 2018, and is intended for reports claiming violations of the German Criminal Code provisions listed in NetzDG.

The NetzDG reporting form can be found in Facebook’s Help Center, [on a page](#) dedicated to helping individuals understand NetzDG and submit reports. This Help Center page can be accessed by everyone (users and non-users) from our homepage via the link titled “Impressum/AGB/NetzDG.” This link leads users to a page, which contains a link to the NetzDG Help Center page. By clicking on “report” in the Help Center page, users reach the form that leads them through the process of submitting a NetzDG report. In addition, as a publicly accessible website, the NetzDG Help Center page can be reached via a number of external search engines with different keywords. Similarly, the page is searchable in our Help Center.

So that Facebook can properly evaluate the claim and comply with Section 2 (“Reporting obligation”) of NetzDG, people are prompted to provide the following information in the reporting form:

- Complete contact information, including whether the reporter is an official authority (Beschwerdestelle) under NetzDG
- Links to the specific content on Facebook that is the subject of the report, if available
- Section(s) of the German Criminal Code alleged to have been violated by the reported content
- Specific statements or images in the reported content that are alleged to be unlawful under NetzDG
- Why these statements or images are alleged to be unlawful under NetzDG

- A court order, if available
- An electronic signature

Once an individual has completed the NetzDG reporting form and clicks “send,” their report automatically reaches us through an internal review tool - no additional action is required by the reporting party. We then take a two-step approach to reviewing content that is reported through the NetzDG reporting form. First, we review the reported content under our Community Standards. If it violates our Community Standards, we want to ensure that it is removed from the platform globally. Second, if the reported content does not violate our Community Standards, we review it for legality based on the information provided in the report. Specifically, we assess whether the reported content violates the relevant provisions of the German Criminal Code listed in NetzDG. If the reported content is deemed to be unlawful under NetzDG, we will disable access to that content in Germany (see further information on how we handle NetzDG reports in Section 4). We also communicate with the reporting party to provide updates on their report, request additional information if necessary, and inform them about our decision once we have finished reviewing the report (see further information on this in Section 9).

3. REPORT VOLUMES

Number of incoming complaints about unlawful content in the reporting period, broken down according to whether the complaints were submitted by complaints bodies (Beschwerdestelle) or by users; according to the reason for the complaint.

The following tables show the number of reports submitted through the NetzDG reporting form between July 1, 2018 and December 31, 2018. Please note that complaint bodies and other individuals may identify multiple pieces of content in a single NetzDG report. The numbers reflected in the tables below pertain to reports submitted rather than unique pieces of content identified in the reports. It is worth noting that in the period between July 1, 2018 and December 31, 2018, there were 500 NetzDG reports identifying a total of 1048 pieces of content. The tables cover two different categories of numbers:

3A. NETZDG REPORTS BY REPORTER TYPE

- This section breaks down the number of reports according to whether they were submitted by complaints bodies or other individuals.

TABLE 1. NetzDG Reports by Reporter Type

Reports from Complaint Bodies	92
Reports from Other Individuals	408
Total	500

3B. NETZDG REPORTS BY CRIMINAL CODE(S) CITED

- This section breaks down the number of reports according to the provision(s) of the German Criminal Code cited by the reporting party.

- Please note that a NetzDG report may cite multiple reasons for illegality. Therefore, the sum of reports listed in the columns in this section exceeds the total number of reports submitted.

TABLE 2. NetzDG Reports by Criminal Code(s) Cited

Criminal Code Provision	Reporter Type		
	Reports from Complaint Bodies	Reports from Other Individuals	Total
Dissemination of propaganda material of unconstitutional organizations (§ 86)	3	35	38
Using symbols of unconstitutional organizations (§ 86a)	10	49	59
Preparation of a serious violent offense endangering the state (§ 89a)	3	12	15
Encouraging the commission of a serious violent offense endangering the state (§ 91)	2	13	15
Treasonous forgery (§ 100a)	4	16	20
Public incitement to crime (§ 111)	11	53	64
Breach of the public peace by threatening to commit offenses (§ 126)	11	30	41
Forming criminal or terrorist organizations (§§ 129 - 129b)	4	15	19
Incitement to hatred (§ 130)	32	113	145
Dissemination of depictions of violence (§ 131)	9	55	64
Rewarding and approving of offenses (§ 140)	8	38	46
Defamation of religions, religious and ideological associations (§ 166)	8	54	62
Distribution, acquisition, and possession of child pornography (§ 184b in conjunction with § 184d)	8	16	24
Insult (§ 185)	40	221	261
Defamation (§ 186)	30	185	215
Intentional defamation (§ 187)	32	178	210
Violation of intimate privacy by taking photographs (§ 201a)	11	67	78
Threatening the commission of a felony (§ 241)	6	43	49
Forgery of data intended to provide proof (§ 269)	8	27	35

4. ORGANIZATION, PERSONNEL RESOURCES, EMPLOYEE EXPERTISE, TRAINING, AND SUPPORT

Organization, personnel resources, specialist and linguistic expertise in the units responsible for processing complaints, as well as training and support of the persons responsible for processing complaints:

4A. ORGANIZATION

NetzDG reports are reviewed in three stages by teams of trained professionals and lawyers. First, content reported via the NetzDG reporting form is reviewed by members of the Facebook Community Operations team. Facebook's Community Operations team is a mix of full-time

employees, contractors and companies we partner with. Each NetzDG report is reviewed by an individual member of this team through our contractual partnership with Arvato in Berlin to determine whether it violates Facebook's Community Standards (as opposed to reviewing the content for potential unlawfulness, which as discussed below is handled by separate teams). If the content is found to violate the Community Standards, then the content is removed.

Second, all NetzDG reports containing content that was not removed for violating Community Standards undergo a multi-stage legal review process handled by our Legal Takedown Request Operations team. This team is made up of two groups - a group of Facebook employees based out of Facebook's Dublin office and a group of contractors based out of Facebook's Dublin and Austin offices. NetzDG reports containing content that was not removed for violating Community Standards are first reviewed by the contractors that work out of our Dublin and Austin offices. The purpose of this review stage is to ensure that manifestly unlawful content is blocked within 24 hours. Each report is reviewed by an individual member of that team, who is tasked with identifying and blocking manifestly unlawful content, and corresponding with the reporting party when the report lacks critical context. All of this is done in accordance with guidance developed by Facebook's in-house lawyers and external legal counsel. Should the report require more granular investigation, it is enqueued for review by one of the Facebook Legal Takedown Request Operations team employees. That individual will then carefully review the report and take appropriate action in instances where illegality or legality can be determined on the basis of guidance prepared for the team by Facebook's in-house lawyers and external legal counsel.

Third, where the legality of reported content is unclear, the report is then escalated to Facebook's in-house lawyers. Should our in-house lawyers have any questions about the legality of content identified in a report, they obtain a legal assessment from outside counsel in Germany. Once a decision on how to handle the content is made, the Legal Takedown Request Operations team handles any advised content actions and corresponds directly with the reporting party and the reported user.

There is a lot of communication between content reviewers at each stage of the review process. The Arvato team works closely with their Community Operations counterparts in Facebook's Dublin office, who provide training, additional guidance, and Community Standards expertise on NetzDG cases as needed. Similarly, the group of Legal Takedown Request Operations contractors work closely with the Legal Takedown Request Operations employees in Dublin, who provide training, guidance, and assistance on challenging or unique reports. A similar line of communication is also open between the Facebook Legal Takedown Request Operations employees and a team of Facebook's in-house lawyers. These two teams meet multiple times a week to discuss legally complex reports, and communicate informally to review and discuss NetzDG reports. Each week, the Legal Takedown Request Operation team sends out an update email to a cross-functional team within Facebook to provide updates on report volumes, trends, and challenging or complex reports.

4B. PERSONNEL RESOURCES AND EXPERTISE

63 individuals spread across three teams are trained to process NetzDG reports. These individuals also engage in work outside of NetzDG reports, which allows for flexible staffing. When reporting volumes are low, only a subset of these individuals process NetzDG reports. When volumes increase, additional trained members of the teams can be utilized to process reports as well. The personnel resources and expertise of each team is as follows:

- **Community Operations** – On December 31, 2018, there were 44 individuals on this team eligible to handle NetzDG reports. Prior to handling NetzDG reports, all of these individuals were required to display proven operational efficiency over the course of at least 3 months on other types of content takedown requests. In addition, all of these individuals are fluent in German, and have received NetzDG training (as further discussed in Section 4c below). As noted above, these individuals also engage in other work outside of NetzDG to help balance their workload depending on NetzDG reporting volumes.
- **Legal Takedown Request Operations** – On December 31, 2018, there were a total of 17 individuals working on the Legal Takedown Request Operations team. 8 of these individuals were contractors, and 9 were Facebook employees. The 8 contractors are all fluent in German and have received NetzDG training (as further discussed in Section 4c below). 100% of the reports that reached the Facebook employees on the Legal Takedown Request Operations team between July 1, 2018 and December 31, 2018 were handled by team members that are fluent in both German and English. Additionally, other members of the team are fluent in French, Turkish, Arabic, Polish, and Dutch to assist in case certain reports or content are in one of those languages. The 9 employees have varied backgrounds to account for both the legal and operational complexities of NetzDG reports. Specifically, 5 have law degrees, and all 9 had operational experience in other roles before joining the team. All of these individuals have received NetzDG training (as further discussed in Section 4c below).
- **Legal** – On December 31, 2018, there were 2 in-house lawyers involved in handling NetzDG-related reports (among other work). These two lawyers are content specialists with a breadth of experience handling legal takedown requests. These lawyers work closely with the Legal Takedown Request Operations team and correspond regularly with external legal counsel in Germany for advice on specific NetzDG reports.

4C. TRAINING AND SUPPORT

Facebook provides the teams that handle NetzDG reports with distinct types of training due to the nature of their respective work. As Community Operations team members only review NetzDG reports for violations of Facebook’s Community Standards, their training is focused on developing operational skills and expertise in Facebook’s Community Standards (rather than training to assess legality of content). All Community Operations team members undergo at least three weeks of training in content review under Facebook’s Community Standards. Importantly, as noted above in Section 4b, NetzDG reports are only handled by a select group of Community Operations members who reach a certain level of tenure on the team and demonstrate consistently high operational proficiency prior to being considered for the work. Once selected, those individuals then receive training that provides background information on NetzDG to help contextualize their work.

Members of the Legal Takedown Request Operations team review content for illegality and therefore receive greater levels of training on NetzDG and the Criminal Code provisions that make up the definition of “unlawful content” under the law. Every member of this team eligible to handle NetzDG reports receives several weeks of training focused heavily on operational proficiency and NetzDG. The NetzDG-specific trainings include background material on the law, detailed breakdowns of every Criminal Code provision referenced in the law, and instruction on how to correspond with reporting parties and users. The team members also regularly receive refresher trainings in intervals of six months. These refresher trainings provide reminders and updates on operational best practices, as well as breakdowns of common types of reports and commonly cited Criminal Code provisions. The refresher training for the group of contractors is conducted by a Facebook

Legal Takedown Request Operations employee, and the refresher training for the group of Legal Takedown Request Operations employees is conducted by Facebook's in-house lawyers.

Facebook has also developed a robust and diverse program to support its Community Operations and Legal Takedown Request Operations team members. This program currently offers the following services for team members:

- Psychological support and wellness resources through benefits programs
- One-on-one sessions with a full-time, in-house psychologist
- Group therapy
- On-site counseling sessions to support emotional well-being

Facebook is dedicated to providing its content reviewers with a high-quality, diverse support program and will continue to add new services and improve on existing services to accomplish this goal.

5. INDUSTRY ASSOCIATIONS

Membership of industry associations with an indication as to whether these industry associations have a complaints service:

Facebook is a member of the following industry associations in Germany:

- Eco – Verband der Internetwirtschaft e.V. (which includes an internal complaints service)
- Bitkom – Bundesverband Informationswirtschaft, Telekommunikation und neue Medien e.V. (which do not have an internal complaints service)
- BVDW – Bundesverband Digitale Wirtschaft e.V. (which do not have an internal complaints service)

In addition to the industry associations listed above, Facebook is a party to FSM e.V. (Freiwillige Selbstkontrolle Multimedia-Diensteanbieter) as well as to DsiN (Deutschland sicher im Netz e.V.), and maintains a close working relationship with [Jugendschutz.net](https://www.jugendschutz.net). While not industry associations, these organizations also operate in the field of combating illegal content and promoting safety online.

6. EXTERNAL CONSULTATION

Number of complaints for which an external body was consulted in preparation for making the decision:

We have not consulted any external bodies in preparation for making a decision on individual reports.

However, of the 500 reports received between July 1, 2018 and December 31, 2018, we consulted external legal counsel (who we do not consider to be an “external body” but rather an extension

of our legal team) 23 times in preparation for making a decision on individual reports. All of these consultations were with outside counsel in Germany, who we work with for clarification on the law for reports when needed.

7. DELETION/BLOCKING VOLUMES

Number of complaints in the reporting period that resulted in the deletion or blocking of the content at issue, broken down according to whether the complaints were submitted by complaints bodies or by users, according to the reason for the complaint, according to whether the case fell under section 3 subsection (2) number (3) letter (a), and if so, whether the complaint was forwarded to the user, and whether the matter was referred to a recognized self-regulation institution pursuant to section 3 subsection (2) number (3) letter (b):

The following table depicts the number of times in which content was deleted or blocked following reports submitted through the NetzDG reporting form between July 1, 2018 and December 31, 2018. Please note the following about this table:

- This table breaks down the number of times a report led to the deletion or blocking of content according to the provision(s) of the German Criminal Code cited by the reporting party.
- Individuals may identify multiple pieces of content in a single NetzDG report. The numbers reflected in the tables below pertain to reports submitted rather than unique pieces of content identified in the reports. It is worth noting that in the period between July 1, 2018 and December 31, 2018, 159 NetzDG reports resulted in the deletion or blocking of content. This amounted to a total of 369 deleted or blocked pieces of content.
- Individuals may cite multiple reasons for illegality in a single NetzDG report. If we took action on content pursuant to a report, it is listed in the table under every provision cited in the report. Therefore, the sum of deletions/blocks listed in the table below exceeds the total number of reports that led to the deletion or blocking of content.

TABLE 3. Deletion/Blocking Volumes

Criminal Code Provision	Reporter Type		
	Reports from Complaint Bodies	Reports from Other Individuals	Total
Dissemination of propaganda material of unconstitutional organizations (§ 86)	0	12	12
Using symbols of unconstitutional organizations (§ 86a)	5	17	22
Preparation of a serious violent offense endangering the state (§ 89a)	1	1	2
Encouraging the commission of a serious violent offense endangering the state (§ 91)	1	2	3
Treasonous forgery (§ 100a)	0	1	1
Public incitement to crime (§ 111)	3	16	19
Breach of the public peace by threatening to commit offenses (§ 126)	2	8	10
Forming criminal or terrorist organizations (§§ 129 - 129b)	0	2	2

Incitement to hatred (§ 130)	19	35	54
Dissemination of depictions of violence (§ 131)	1	7	8
Rewarding and approving of offenses (§ 140)	2	7	9
Defamation of religions, religious and ideological associations (§ 166)	3	10	13
Distribution, acquisition, and possession of child pornography (§ 184b in conjunction with § 184d)	1	2	3
Insult (§ 185)	11	69	80
Defamation (§ 186)	2	50	52
Intentional defamation (§ 187)	3	44	47
Violation of intimate privacy by taking photographs (§ 201a)	1	22	23
Threatening the commission of a felony (§ 241)	2	13	15
Forgery of data intended to provide proof (§ 269)	0	2	2

Number of times a case fell under section 3 subsection (2) number (3) letter (a) and we reached out to the user who posted the reported content for additional facts: 7.

We did not refer any of these matters to a recognized self-regulation institution.

8. DELETION/BLOCKING TURNAROUND TIMES

Time between complaints being received by the social network and the unlawful content being deleted or blocked, broken down according to whether the complaints were submitted by complaints bodies or by users, according to the reason for the complaint, and into the periods “within 24 hours”/“within 48 hours”/“within a week”/“at some later point”:

The following table contains a breakdown of the time taken to delete or block content deemed unlawful or in violation of our Community Standards after receiving a NetzDG report. This table concerns reports submitted through the NetzDG reporting form between July 1, 2018 and December 31, 2018.

This table shows the following details for each report where a piece of content was deleted or blocked: (1) the type of reporter who submitted the report, (2) the time it took to delete or block the reported content, and (3) the provision(s) of the German Criminal Code cited by the reporter in the report. Please note the following about this table:

- As set forth under section 2 subsection (2) number (8), our removal time is divided into: (a) 24 hours, (b) 48 hours, (c) 7 days, and (d) > 7 days.
- The time periods refer to the time between when the report was submitted and the last action we took in response to the report. As an example, if a report identified two pieces of content and we actioned one piece within 24 hours and the other within 7 days, then that report would be listed in the table as taking action on within 7 days.

- Individuals may cite multiple reasons for illegality in a single NetzDG report. If we took action on content pursuant to a report, it is listed in the table under every provision cited in the report. Therefore, the sum of blocks listed in the table below exceeds the total number of reports that led to the deletion or blocking of content. It is worth noting that of the 159 reports that led to a block or deletion, our last block/deletion action occurred within 24 hours 108 times, within 48 hours 11 times, within 7 days 19 times, and after 7 days 21 times.

TABLE 4. Deletion/Blocking Turnaround Time

Criminal Code Provision	Reporter Type							
	Reports from Complaint Bodies				Reports from Other Individuals			
	24 Hours	48 Hours	7 Days	> 7 Days	24 Hours	48 Hours	7 Days	> 7 Days
Dissemination of propaganda material of unconstitutional organizations (§ 86)	0	0	0	0	11	0	0	1
Using symbols of unconstitutional organizations (§ 86a)	4	0	1	0	15	0	1	1
Preparation of a serious violent offense endangering the state (§ 89a)	0	1	0	0	1	0	0	0
Encouraging the commission of a serious violent offence endangering the state (§ 91)	0	1	0	0	2	0	0	0
Treasonous forgery (§ 100a)	0	0	0	0	1	0	0	0
Public incitement to crime (§ 111)	2	1	0	0	15	0	1	0
Breach of the public peace by threatening to commit offenses (§ 126)	1	1	0	0	8	0	0	0
Forming criminal or terrorist organizations (§§ 129 - 129b)	0	0	0	0	2	0	0	0
Incitement to hatred (§ 130)	10	5	1	3	30	1	2	2
Dissemination of depictions of violence (§ 131)	0	1	0	0	5	1	0	1
Rewarding and approving of offenses (§ 140)	1	1	0	0	7	0	0	0
Defamation of religions, religious and ideological associations (§ 166)	2	0	1	0	9	0	1	0
Distribution, acquisition, and possession of child pornography (§ 184b in conjunction with § 184d)	1	0	0	0	2	0	0	0
Insult (§ 185)	3	1	5	2	52	3	5	9
Defamation (§ 186)	0	0	2	0	30	1	9	10
Intentional defamation (§ 187)	0	0	3	0	25	1	8	10
Violation of intimate privacy by taking photographs (§ 201a)	0	0	1	0	13	1	3	5
Threatening the commission of a felony (§ 241)	0	1	1	0	11	0	1	1
Forgery of data intended to provide proof (§ 269)	0	0	0	0	2	0	0	0

9. CORRESPONDENCE

Measures to inform the person who submitted the complaint, and the user for whom the content at issue was saved, about the decision on the complaint:

We take a variety of measures to correspond with people who report content through the NetzDG reporting form, and members of our community whose content is deleted or blocked under NetzDG.

9A. CORRESPONDENCE WITH REPORTING PARTY

When someone submits a report, we correspond with them over email and through their Facebook Support Inbox (if the reporter is logged into their Facebook account when submitting their report). Immediately after receiving a report, we send the reporting party an automatic response informing them their report is being reviewed, and providing them with a reference number and link to our NetzDG Help Center. If we are still looking into a report 24 hours after submission, we inform the reporting party that we are continuing to review the report. If at any point we need additional information from the reporting party to review the report, we will ask the reporting party for that information.

Once we decide what, if any, action to take on the reported content, we provide the reporting party with tailored correspondence that informs them of why we did or didn't take action on the reported content. This can take a variety of forms depending on the result of our review, but can broadly be categorized into the following:

- **Reported content is deleted for violating Community Standards.** In this circumstance, we inform the reporting party that the content has been removed because it violated our Community Standards. We also provide links to our NetzDG Help Center page and our Community Standards in case the reporting party would like additional information.
- **Reported content is blocked for violating a German Criminal Code provision covered by NetzDG.** In this circumstance, we inform the reporting party that the content is no longer accessible in Germany, and state the specific Criminal Code provision under which we determined the content was unlawful. We also provide a link to our NetzDG Help Center page in case the reporting party would like additional information.
- **Reported content does not violate Community Standards or a German Criminal Code provision covered by NetzDG.** In this circumstance, we inform the reporting party that we have reviewed the report, but are not in a position to remove the content because we determined it was not unlawful.
- **Variety of actions taken on reported content.** Individuals may identify multiple pieces of content in a single NetzDG report. We review each piece of content individually and act accordingly. In order to limit the amount of correspondence we send the reporting party, we generally will review and act on each piece of reported content before informing them of our decisions. If we take different actions on content identified in a report (e.g., we block one piece of content and do not take any action on another piece of content), we will provide the reporting party with specific information on what we did, using a hybrid of the responses explained above.

In addition to the information we provide in response to specific reports, individuals can also find comprehensive educational information about NetzDG in our [NetzDG Help Center](#). The NetzDG

Help Center contains information about (1) the type of content individuals can report under NetzDG, (2) what happens after an individual submits a NetzDG report, (3) how to report content an individual believes is subject to NetzDG, (4) what information to include in a NetzDG report, (5) the kinds of proceedings for which the Zustellungsbevollmächtigter is appointed under Sec. 5(1) NetzDG, (6) the difference between NetzDG and Facebook's Community Standards, and (7) where individuals can find our NetzDG Transparency Reports.

9B. CORRESPONDENCE WITH POSTING USER

We also correspond with users whose content is deleted or blocked following a NetzDG report. If we delete content for violating our Community Standards, we inform the posting user of our action through the Facebook Support Inbox. In our messaging, we inform the user of our action and let them know their content violated our Community Standards. If we block content for violating a German Criminal Code provision covered by NetzDG, we inform the posting party via email of our action and of the specific German Criminal Code provision the content violated. We also correspond with posting users whose content is reported as defamatory to get additional facts or substantiation when necessary to determine if the content is unlawful. If a report results in no action being taken on a user's content, we don't notify the user.
